DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 4-11, 25-32, drawn to an apparatus for a transmitter, classified in class 455, subclass 91.
 - II. Claims 2, 12-16, 33-37, drawn to an apparatus for a receiver, classified in class 455, subclass 130.
 - II. Claims 3, 17-24, 38-45, drawn to an apparatus for a transceiver, classified in class 455, subclass 73.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I (claims 1, 4-11, 25-32), Group II (claims 2, 12-16, 33-37) and Group III (claims 3, 17-24, 38-45) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Groups II and III both have separate utility from Group I such as a receiver circuit, while the invention of Group III has separate utility from Group II such as a transmitter circuit. See MPEP § 806.05(d).
3. This application contains claims directed to the following patentably distinct species of the claimed invention of Group I: claims 1, 4-11 are detailed to a dual-band transmitter. Claims 1, 25-32 are detailed to a tri-band transmitter.

Art Unit: 2685

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

4. This application contains claims directed to the following patentably distinct species of the claimed invention of Group I : claims 2, 12-16 are detailed to a dual-band receiver. Claims 2, 33-37 are detailed to a tri-band receiver.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 2 is generic.

5. This application contains claims directed to the following patentably distinct species of the claimed invention of Group III : claims 3, 17-24 are detailed to a dual-band transceiver. Claims 3, 38-45 are detailed to a tri-band transceiver.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 3 is generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2745

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. In summary, there are total six groups of invention as follows: Group I includes claims 1, 4-11; Group II includes claims 1, 25-32; Group III includes claims 2, 12-16; Group IV includes claims 2, 33-37, Group V includes claims 3, 17-24 and Group VI includes claims 3, 38-45.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
